DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-67 and 74-79 and 81-84, drawn to image processing specifically spatial filtering, classified in class 382, subclass 210.
- II. Claims 68-73 and 80, drawn to optical systems specifically single channel simultaneously to or from plural channels, classified in class 359, subclass 618.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and I are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as an optical system in which an optical beam is created by combining two beams, this system can be used in combination with invention I for the pattern recognition. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2625

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
